

# MPM2D Quadratics Summative Prep

Name \_\_\_\_\_

- Use any of the given equations or graphs to demonstrate your learning of quadratics.
- Use the “I can” list provided to guide you.
- Clearly label the expectation # and Equation Letter that you are using.
- You may use the same equation multiple times. You do not need to use every equation.

A.  $y = x^2 - 3x - 18$

B.  $y = -2(x - 3)^2 + 5$

C.  $y = (x + 3)(2x - 1)$

D.  $25x^2 - 49$

E.  $y = 6x^2 - 5x - 4$

F.  $y = 3x^2 + 9x - 12$

G.
